

PLL240001 - IESNA Type II Medium

- Material = PC
- Full angle at 50% from maximum: $\sim 145^\circ \times 75^\circ$
- Full angle at 10% from maximum: $\sim 165^\circ \times 110^\circ$
- The light spots here represented refer to tests carried out with LEDs with 3mm dome and 2mm² LES, $\sim 260\text{lm@LED}$

Note:

- Dimensions in inches into brackets
- For missing dimensions see 3D file
- MIRR surfaces mirror polished
- GRYS surfaces uncoated 25/27 VHX
- HED surfaces available area for gate material. Mark injection will be present
- FIMK surface finished by sand-paper 800
- © Quality Control Dimension (QC)

Project and design owned by Khatod OPTOELECTRONIC s. r. l.

KGAS12 - Gasket for PLL24xxxx

KGAS12 - Physical Characteristics

Hardness sh A : 65 +/-5	Color : Transparent	Abbrev. : SIL 65H TRASP
Basic Element : VMQ	Vulcanization: 10min @ 150°C	Annealing : 4 hours@200°C

Original Parameters	Unit of Measure	Detected Values	Test Method
Hardness	Shore A	65	ASTM D 2240
Hardness	IRHD		
100% Modulus	MPa		ASTM D 412
100% Modulus	N/mm ²		

Tensile strenght	MPa	9	ASTM D 412
Elongation	%	620	ASTM D 412
Tear resistance	N/mm	30	ASTM D 624/B
Specific Gravity	g/cm ³	1.16	ASTM D 297
Brittleness Point	°C		
TR-TEST TR10	°C		ASTM D 1329
TR TEST TR-30	°C		
Compression Set 25% Temperature: 175°C @ 22h	%	27	ASTM D 395/B

Packaging

Item	Quantity	Total Parts	Size (L*W*H)	G.W.
Tray	9 pcs per Tray	9 pcs	50*32 cm	0.52 Kg
Outer Box	20 Trays per Outer Box	180 pcs	50*32*38 cm	10.5 Kg

180 Lenses / Trays

20 Trays / Outer Box

Determination of thermal shock resistance degree

Initial Visual Inspection

Before starting with testing, a visual inspection was performed in order to check the integrity of the part under test.

The part resulted physically intact.

Photo: the part in the climatic chamber.

Temperature set in the climatic chamber

Temperature detected on the part by IR thermal camera

Final Visual Inspection

After testing, a final visual inspection was performed. The result was positive. (view photo)

Photo: the part in the climatic chamber after testing.

Based on the testing result, PLL24000x test specimen proved to overcome the thermal stress test up to 120°C, without any physical deterioration of the material.

Determination of mechanical impact resistance degree (IK tests)

Note

The present document is an internal document showing the tests carried out by Khatod in its laboratory. The tests, photos and videos presented in this document are made available for demonstration purposes only. Khatod, with its laboratory, is not a certification body. If customers need IK accredited certifications, they have to apply to the appointed Certification Bodies, under their sole care and responsibility.

Initial Visual Inspection

- Before starting with testing, a visual inspection was performed in order to check the integrity of the part under test. The part resulted physically intact.

Tests Execution

Tests were carried out on the part under test according to IK08 (5 Joules)
Test parameters are as follows:

- Impact energy: 5 Joules
- Impacting element: 1800 grams
- Distance between impacting element and the part under test: 29,5 cm
- Number of impacts: 5

1st TEST

2nd TEST

3rd TEST

Final Visual Inspection:
After testing, a final visual inspection was performed.
The result was positive. (view photo)

IP X5 Test

Note

The present document is an internal document showing the tests carried out by Khatod in its laboratory. The tests, photos and videos presented in this document are made available for demonstration purposes only. Khatod, with its laboratory, is not a certification body.

If customers need IP accredited certifications, they have to apply to the appointed Certification Bodies, under their sole care and responsibility.

Data and Analysis

The sample has been subjected to the water-penetration resistance test as follows:

- Assembly of the components to test :
A moisture indicator paper sheet has been interposed between the lens and the clamping base
- Positioning of the assembled sample under the device of watering with nozzle Ø 6.3 millimeters
- Water flow: 12.5 l/min \pm 5%
- Water pressure: 30 kPa @ distance of 3m
- Duration of water spraying test on the wrap surface per m² : 1 min
- Minimum duration of the test: 3 min
- Distance between the nozzle and the wrap surface: 2.5 Meters

Testing under water jet

Testing under water jet

Conclusion

The test paper sheet is dry

As shown in the photo, the test paper sheet is completely dry after disassembling the system.

Based on the water penetration resistance test, KGAS12 gasket proved to be fit for purpose.

The product has passed the Khatod test.

Materials

Material	Top
PC	-40°...120°C

Notes:

- Intensity (I) and illuminance (E) data are normalized by 1000 lm
- The optical values shown are the result of optical simulations carried out with ASAP and ZEMAX software systems. The optical simulations are carried out on the basis of the typical values provided in the LED manufacturers' official datasheets. The photometric analysis has been carried out on physical samples. On request, by supplying your PCB, we can provide the measurement photometric file.

Use and Maintenance

- DO NOT HANDLE OR INSTALL LENSES WITHOUT WEARING GLOVES, SKIN OILS MAY DAMAGE LENS OR LIGHT TRANSMISSION;
- CLEAN LENSES WITH MILD SOAP AND WATER AND A SOFT CLOTH;
- DO NOT USE ANY COMMERCIAL CLEANING SOLVENTS ON LENSES.

Disclaimer

Please note that flow lines and weld lines on the external surfaces of the lenses are acceptable if the optical performance of the lens is within the specifications.

Should you require further information, please contact Khatod for advice. All lens testing must be subject to identical conditions as Khatod test condition. Khatod Optoelectronic, Milan, Italy, manufactures lenses for LEDs. Any other use of the lens shall void our liability and warranty. The lenses are an inert component to be used in the manufacture of various products. Our warranty and liability are limited only to the manufacture of the lens. You may not modify, copy, distribute reproduce, license or alter the lens and related materials of Khatod. Khatod does not warrant against damages or defects arising out of the use or misuse of the products; against defects or damage arising from improper installation, or against defects in the product or in its components. No warranty of any kind, expressed or implied, is made regarding the safety of the products. The entire risk as to the quality or performance of the product is with the buyer.
